

Summit Strategic Planning Workshops

Providing a broad lens to examine systems

What's at Stake

Sometimes, community-level work is not enough to provide transformative systems change. Instead of using a community or jurisdiction-based framework, it can be helpful to focus on a regional or state approach. This allows higher-level decision-makers to be brought into the conversation.

Decision-makers may be able to determine state-level funding options or to advance legislation. They can also offer a broader, more complete view of how different regions interact with one another. They can share best and promising practices from across a region or state.

Our Solution

The **Summit Strategic Planning Workshop** helps regions and states identify resources, duplications, and gaps in their system on a broad level. First, we work with you to determine a targeted scope for your systems mapping event. Then, we help you assemble a diverse group of attendees that can provide a wide variety of perspectives. Together, we build an agenda that may involve one of the following:

- Planning for program implementation across a state or region
- Hosting panels to highlight high-performing communities
- Providing training so your attendees can lead local mapping events
- Identifying best practices for state-wide implementation
- Adapting programs for urban, suburban, rural, and frontier communities

Participants

The participants involved in **Summit Strategic Planning Workshops** vary based on the model being applied and the target goal. They can include the following:

- Judiciary representatives
- Legislators
- Politicians
- State-level directors

Our Model

The **Summit Strategic Planning Workshop** is a broad service that can be applied to many systems and locations. A **Summit Strategic Planning Workshop** can use any of the Systems Mapping and Training Center's models, including Sequential Intercept Model Mapping Workshops and Homeless Response Systems Mapping.

We can customize each of our cross-systems mapping services and models for your locality's needs. The Systems Mapping and Training Center will bring its national expertise to help you make the best choices for your state or region.

Get Started With the SMTC

The Systems Mapping and Training Center, operated by [Policy Research Associates](#), uses a public health model to create data-driven systems change. The Systems Mapping and Training Center provides cross-systems mapping and training services on different topics related to behavioral health, the criminal legal systems, Veterans, homelessness, and more.
